

Medical Moment with Trisha Springstead - My Questions

So I have been reading a lot, Dahr, Lacey, Craig Pittman, Jim Joiner, Professor Garth Nicholson, Randy Fricke, Dr Susan Kolb, Dr Guy McPherson, Naomi Klein, Rolling Stone. I've been reading books on Climate Change Writings, books on "What is God?", books on oil spills, ocean acidification, corporations are not people, and civil unrest. I have been studying up on "genetically modified" mosquitoes and foods, and all of the insanity that we are seeing with it on a daily basis. I have been reading the works of Niche, Dr Riki Ott, Dr Wilma Subra, and many books on End Time Madness. I have been watching National Geographic, all of The Times ie: Tampa, London, New York, Los Angeles, the writings on Dr Ira Leifer, Dr Valentine. I have been reading books by some of the greatest writers of our times and their articles. I have been listening to music of all kinds, looking at art in all forms.

Daily I Devour the writing of lawyers, judges, scientists, researchers and healers and for the past 14 years I have been reading and studying and learning about poverty, government, military, medicine, the NSA, Big Brother, and the teachings of Buddha, Christ, Mohammed, and Krishna. What have I learned?

We are living in awesome times; we are living in frightening times. Oil wells are blowing up, wars are erupting, pipelines are bursting, people are rioting, and economies are being destroyed. Radiation readings and waste at an all time high, concern and compassion for the plight of each other at a somewhat all time low.

We are on the Climate Precipice and the waters will rise. Already so much of our Water is sick, and with that humans and animals are poisoned. Trains are derailling and exploding, tar sands and dirty energy keep being introduced into our environment. Our elected officials are fighting each other and no longer represent the very people who elected them, even though we have been screaming for years.

SO MY QUESTION is, what **do we DO? What are YOU going to DO?** How do we change what is happening and can it ever be changed? Has Mother Earth grown weary of us sucking her up and using her and our oceans and destroying her land inch by inch and mile by mile? What do we do to change this? **Can we change this?**

Trisha Springstead, RN, MBS has worked in many areas of medicine and research and has worked with the people impacted by the Gulf Oil Spill and continues to fight to expose and help those suffering with illnesses in the Gulf. It has been proven that oil mixed with Corexit and industrial solvents, PAH's, impact the effects of the toxicity oil on humans, animals. The devastation to our ecosystem and environment have been highly explored and documented. The work of many before her has taught Trisha so very much, including her integrative health consultant, Dr. Wilma Subra, Dr. Riki Ott, Dr. Michael Robicheaux, MaryLee Orr, Dr. Paul Sammarco, Dr. Ira. Leifer, Dr. Linda Hooper-Bui. Dahr Jamail, and all of the people who suffer from exposure to these dangerous chemicals and the bacterial organisms.
